#### 18. SUPPLEMENTARY NOTES

iction

Appendices A through C and E to this report were reproduced separately (see list of appendices on inside of front cover). Appendix D was reproduced on microfiche and is included in an envelope inside the back cover.

## 19. KEY WORDS (Continue on reverse side if necessary and identify by block number)

Aquatic environment

Dredged material disposal

Bottom sediment

Field investigations

Columbia River

Sedimentation

Dredged material

Waste disposal sites

# 20. ABSTRACT (Continue on reverse side if necessary and identity by block number)

A multidisciplinary study was conducted offshore of the mouth of the Columbia River to characterize the baseline physical, chemical, and biological aspects of the nearshore zone and to investigate the effects of open-water disposal on the study area. The results of this study are summarized in this report. Detailed results of the various research efforts are contained in Appendices A-E.
